

French Ministry of Industrial Renewal

The Ministry for Industrial Renewal prepares and implements government policy regarding industry, small and medium size businesses, electronic mail and communications, services and innovation. In this role, it takes part in protecting and promoting jobs in the industrial and service sectors. It makes assignments relating to business start-ups and simplifies the formalities they have to face.

Together with the Ministry of Economy and Finance, it prepares and implements policy regarding the French economy's competitiveness, and how attractive it is for investors and stakeholders. It plays a role in defining business taxation and policy on financing businesses. It's associated with defining and implementing policy in the food industry and forestry fields.
