

## **Global Energy Holding Company**

Purposes for which the company has been formed are as follows:

Partnership with companies in a ratio that enables it from mastering them.

Construction, operation, and maintenance of electricity generation stations, using either oil, gas, atomic energy, solar energy, wind energy, geothermal energy, waste energy, or fossil fuel.

Construction, synchronization, management and operation of electricity transmission and distribution networks.

Construction, operation and maintenance of water transportation and distribution networks using traditional or renewable energy.

Transportation and storage of atomic and radioactive materials.

Performing radiation protection measurements.

Construction and management of burial caves for radioactive waste products.

Mining, segregation, and manufacturing mineral resources needed for development of atomic power system.

Provision of security and safety for electric generation plants, especially atomic ones.

Provision of security and safety for the different premises of the atomic power system.

Exploration and evaluation of variable energy resources, such as geothermal, wind and solar energy.

Exploration of metal resources, especially those related to the development of atomic energy system.

Construction, operation and maintenance of dual purpose stations, for power generation and cooling or air conditioning, or for power generation and water desalination.

Human resources training in the fields of energy and electricity.

Research sponsorship in the fields of energy and electricity.
