

## **PGO Automobiles**

Cars exert a genuine fascination for all those for whom driving rhymes with pleasure, whether they are enthusiasts or simple admirers. PGO Automobiles, last French manufacturer of small production cars, has decided to make them accessible.

From its very beginning, the use of French tradition combined with artisanal “savoir- faire”, PGO designs and produces unique cars, offering the true car enthusiast a real treat. Beyond the beautiful adventure that is the creation and development of the PGO brand, our main goal is to meet our clients’ desires. Elegance and fineness are the values that define our exclusive and fascinating cars like the roadster and the “coupe”.

Balancing between vintage and modernity, fitted with modern and brilliant engineering, the composite body adopts flowing shapes. A body all in curves equips the Speedster II, the Cevennes as well as the Hemera, with the assurance and distinction of a piece of haute couture.

Interior covered with leather, glossy lacquer, dials with chromium rings or aluminium features, everything is studied to provide the greatest pleasure for those who sit inside a PGO. Under its retro aspect, the PGO is a good match to what could be the definition of a cutting edge car: a car entirely oriented towards its users.
